

SCHWEGO® plus 8441

Deep cleaning agent and rejuvenator for blankets and rollers

Function

In the course of time dirt will accumulate in the pores of the rollers and will lead to trouble in the printing process. A mixture of dirt will form by the various influences; this mixture cannot or can only be dissolved with difficulties with the commercial, regularly used mineral oil cleaning agents.

SCHWEGO® plus 8441 will dissolve these tenacious dirt accumulations and will lead in the second step to a rejuvenation of the rubber materials. Rollers and blankets become more subtle and the treated surface will improve the ink and fountain water transport.

Properties

- Dissolves complex, mixed dirt accumulations and will lead to pore-deep
- Prolongs the service life of the blankets and rollers
- Rejuvenates the blanket surface
- Rollers and blankets will regain their elasticity
- Improves the ink and water transport
- Free from chlorinated and aromatic hydrocarbons

Flash point 32° C

Application In order to treat the blanket or the rollers SCHWEGO® plus 8441 is applied each

time after the basic cleaning process.

In case of soiling especially by deposits of calcium, it is recommending to use

SCHWEGO® calci clean 8179 beforehand.

Subject to appropriate storage, the described properties of SCHWEGO® plus 8441 Storage

remain stable for at least 24 months.

1 l bottle | 20 l canister | 200 l drum **Packaging**
