

## SCHWEGO® soft 2000 WX

Fountain additive for coldset printing | Anilox printing

certified by

**Function** SCHWEGO® soft 2000 WX is a fountain additive especially tailored to the requirements of Anilox short inking units.

Unlike conventional offset inking units, this application uses low-viscosity printing inks that require rapid transfer.

This calls for a specially formulated dampening solution. Standard dampening solutions for newspaper printing quickly lead to over-emulsification and uncontrollable tone issues when used with anilox inks. SCHWEGO® soft 2000 WX eliminates these problems.

SCHWEGO® soft 2000 WX for water hardness of 4° to 10° KH

### Properties

- Fast running free behaviour
- Reduction of waste paper
- Reduced ink/water supply
- Excellent anti-linting behaviour (reduces lint build-up)
- Stable adjustment of the pH-value
- Checked and released according to default settings of the machine builders
- Complexing of the hardness formers prevents any deposits on the ink and damping rollers

**Quantity to add** SCHWEGO® soft 2000 WX is added to the water with a ratio of 2-3%.

**Storage** Subject to appropriate storage, the described properties of SCHWEGO® soft 2000 WX remain stable for at least 12 months.

**Packaging** 10 kg canister | 20 kg canister | 200 kg drum | 1000 kg container
