

SCHWEGO® neutral fount CS

Fountain additive for coldset printing

certified by

Function SCHWEGO® neutral fount CS is a fountain additive for the requirements of coldset printing with a special view to anti-linting behaviour.

It can be used with all damping units and is excellently suitable for conventional newspaper production.

Properties

- Excellent anti-linting behaviour (reduces lint build-up)
- Stable adjustment of the pH-value around 6,8
- Fast running free behaviour
- Develops a stable ink-water-emulsion even with process and special inks
- Suitable for CtP-plates
- Checked and released according to default settings of the machine builders
- Defined adjustment of the surface and interfacial surface tension
- For all water qualities

Quantity to add SCHWEGO® neutral fount CS is added to the water with a ratio of 2-3%.

Storage Subject to appropriate storage, the described properties of SCHWEGO® neutral fount CS remain stable for at least 12 months.

Packaging 10 kg canister | 20 kg canister | 200 kg drum | 600 kg container | 1000 kg container
